

**MEMORANDUM**  
**COUNTY EXECUTIVE OFFICE**  
**ADMINISTRATION**  
County of Placer

TO: Honorable Board of Supervisors DATE: January 21, 2025  
FROM: Daniel Chatigny, County Executive Officer  
By: Joel Joyce, Legislative and Governmental Affairs Coordinator  
SUBJECT: Placer County 2025 Legislative Advocacy

---

**ACTION REQUESTED**

Provide staff direction on the draft 2025 Legislative Platform.

**BACKGROUND**

The Annual Legislative Platform (Platform) (Attachment A) serves as the foundation for Placer County's advocacy efforts with the executive and legislative branches of state and federal governments. Updates from the 2024 Platform are highlighted using a "red-line" format for clarity. The Platform has been further streamlined to enable focused advocacy on key issues and specific proposals while maintaining flexibility through broad guiding principles. County staff collaborates with the Board, advocacy consultants, and various departments to: (1) sponsor, support, or oppose legislation; (2) address policies, regulations, and laws; and (3) protect local authority and resources.

Placer County, in collaboration with its contracted advocates and member associations, successfully advanced the County's priorities while safeguarding local control over governance and land use decisions. Additionally, the County effectively prevented or mitigated legislation that would have hindered its ability to deliver quality services to residents and maintain fiscal responsibility in administering programs and services.

Since the Legislative Platform is approved early in the calendar year, it may not fully anticipate additional legislative, regulatory, or budgetary issues that arise later in the year. Therefore, the Board retains the ability to review and modify the platform as needed during the legislative session.

The 2025 Legislative Platform introduces updates addressing child support and foster care system issues, underscoring Placer County's dedication to improving these systems through secure funding, efficient processes, and strengthened protections for vulnerable populations. Additionally, the platform includes revised language on wildfire resilience and forest management funding, solid waste management, tax inequities affecting public transit systems, and the preservation of open spaces.

***2024 Legislative Year in Review***

In 2024 the California legislature focused on housing affordability, climate initiatives, and public safety, with major legislation addressing rent control, affordable housing production, and climate resilience. Additionally, November's election saw a handful of ballot measures approved including public safety reform, healthcare, and education funding. The state budget prioritized wildfire prevention, homelessness programs, and infrastructure projects amid economic uncertainty. A few highlights are below:

- Housing and Homelessness:

- Continued focus on addressing housing affordability and homelessness, with laws incentivizing affordable housing construction and tenant protections.
- Streamlining processes for permitting housing developments, particularly in areas facing housing shortages.
- Climate and Environment:
  - Investment in wildfire resilience and sustainable energy initiatives, including expanded funding for forest health projects and electric vehicle infrastructure.
  - Legislation promoting water conservation and the reduction of single-use plastics.
- Public Safety:
  - Enhanced gun safety regulations and new funding programs for community policing.
  - Laws aimed at addressing mental health challenges through expanded care access and reforms under the CARE Act.

### ***State Budget Update***

The FY 2025-2026 California state budget is expected to continue prioritizing critical areas such as housing affordability, homelessness prevention, wildfire resilience, and climate change mitigation. With the state's ongoing economic uncertainties, the budget will likely emphasize balancing fiscal responsibility with minor additional investments in the areas noted above. However, the legislature is expected to maintain flexibility in spending on any budget increases.

### ***Federal Update***

The potential focus for the first 100 days of the 119th Congress will likely center on bipartisan priorities and responding to urgent national issues, including:

1. **Economic Stability:** Addressing inflation and potential economic slowdowns with targeted fiscal policies, small business support, and economic stimulus measures.
2. **Infrastructure Implementation:** Accelerating projects funded by the Infrastructure Investment and Jobs Act, emphasizing roads, bridges, public transit, and energy infrastructure.
3. **Healthcare Initiatives:** Revisiting current healthcare rules and regulations, expanding access to mental health and addiction treatment, and addressing the cost of the healthcare system.
4. **National Security and Public Safety:** Enhancing cybersecurity, advancing public safety measures, and addressing immigration system reform.
5. **Energy and Climate Policy:** Pushing forward initiatives to expand oil and gas drilling domestically, support renewable and non-renewable energy, and improve disaster preparedness in vulnerable areas.
6. **Legislative Priorities of the Administration:** Fast-tracking presidential initiatives in key areas such as tax reforms, education reform, and housing affordability.

### **FISCAL IMPACT**

There is no fiscal impact associated with this item.

### **ATTACHMENT**

Attachment A - Placer County draft 2025 Legislative Platform

2025

# ANNUAL LEGISLATIVE PLATFORM

Board of Supervisors

Bonnie Gore, District 1

Shanti Landon, District 2

Anthony DeMattei, District 3

Suzanne Jones, District 4

Cindy Gustafson, District 5

## EXECUTIVE SUMMARY

The Placer County Board of Supervisors recognizes the need to identify and advocate for its legislative and funding priorities in Sacramento and Washington, D.C. To be effective in this mission, the Board is pleased to present its 2025 Legislative Platform.

Placer County's Legislative Platform is a summary of the priorities of the Board of Supervisors and establishes the basis for its advocacy efforts with the Executive and Legislative branches of the U.S. Government and the State of California regarding legislation and regulation. It also provides general direction to the County Executive Office and County departments, legislative advocates, state and federal delegation members and the public on positions of support or opposition to key policy initiatives which impact the way the County does business. Because the Legislative Platform is approved at the beginning of each year, it is not always possible to anticipate additional legislative, regulatory and/or budgetary issues that may arise at a later date. Thus, the Board may review and modify this document during the two-year legislative session as necessary.

**Rural County Representative of California (RCRC)**

1215 K Street, Ste. 1650

Sacramento, CA 95814

(916) 447-4806 / <http://www.rcrcnet.org/>

## **GENERAL PRINCIPLES**

- A. Seek or support legislation to restore local control and oppose efforts that will hinder or limit the County's ability to self-govern and to maintain land use control.
- B. Seek or support legislation that facilitates orderly economic expansion and growth and increases the opportunity for discretionary revenues and programmatic and financial flexibility for the County.
- C. Seek or support State/Local government fiscal restructuring efforts that align program responsibility and sufficient revenue sources to assure Placer County the financial independence necessary to provide services to its residents and meet its mandated responsibilities.
- D. Seek or support equitable levels of state and federal funding for county-mandated programs. Oppose federal or state legislation for new, transferred, or realigned mandated programs that do not contain their own sufficient revenue source.
- E. Support legislation that provides tax and funding formulas for the equitable distribution of state and federal monies while opposing attempts to decrease, restrict or eliminate County revenue sources.
- F. Seek or support legislation that assures the County's authority to negotiate mutually acceptable tax sharing agreements for annexation, incorporation and redevelopment that protect or enhance the County's ability to provide services to its constituents.
- G. Seek or support legislation that protects the County's quality of life, its diverse natural resources, and continued preservation of agricultural lands, wildlife habitat and open space.
- H. Seek or support cooperation with the federal and state government on regulatory and administrative issues affecting the County to ensure the protection and well-being of its citizens.
- I. Encourage and engage with local agencies and governments to cooperate for the betterment of the community and expand voluntary regional solutions to regional problems.
- J. Seek or support legislation and regulations that provide local agencies program and operational flexibility and allow staff to perform their duties in the most efficient manner.

## **POLICY AREAS**

### **AGRICULTURE, ENVIRONMENT, AND NATURAL RESOURCES**

#### **1. Cap and Trade**

Support and track cap and trade funding criteria for wetlands, forest health, and Sustainable Communities that further advance policies of Placer County. Support legislative efforts to provide long-term cap and trade revenue in these areas.

#### **2. State Route 49 Bridge Debris Removal**

Sponsor legislation that holds Placer County harmless through indemnity or other provisions for removing debris out of the confluence of the North Fork and Middle Fork of the American River.

#### **3. Regional Forest Health and Wildfire Risk Reduction**

Seek or support programs, regulations, legislation, and funding at the state and federal levels to mitigate fire danger with fuel load reduction in critical forests and watersheds and enhance programs for funding recovery when fires occur. Coordinate with agencies, conservancies, and other stakeholders to improve the health of Sierra Nevada forests. In addition, Placer County will continue to advocate for responsible reforms to federal land management. Support legislative/regulatory efforts that would ensure ongoing and necessary levels of funding and accelerated progress on key programmatic elements to facilitate increased forest resilience and wildfire risk reduction work in California and specifically in or affecting Placer County. Support continued emphasis by the California Wildfire and Forest Resilience Task Force and federal Farm Bill on building/investing in local organizations, tribes, and coalitions that can work together to identify priorities, develop programs, implement projects, and track achievements.

##### **a. Biomass**

Support for language in legislation and rulemaking (and any other actions, such as agency funding eligibility and usage guidelines, that relate to these issues through biomass utilization) to ensure that woody biomass from all forest ownerships (public and private) and residential defensible space/green waste programs:

- i. is eligible as fuel for renewable energy,
- ii. can be procured under a stewardship agreement,
- iii. is valued both on the products it creates and on its social, economic, and environmental co-benefits and associated avoided costs,
- iv. continues to be acknowledged as being carbon neutral, and
- v. potential expansion of the BioMAT program (SB1122) throughout all California utilities.
- vi. support the push for establishment of carbon credit markets specifically for biomass facilities and their byproducts (Biochar), and wildfire mitigation efforts on both public and private lands, and
- vii. work with California Air Resources Board to show the increased value of using biomass to power California's transportation fleets with additional opportunity for revenue through the Low Carbon Fuel Standard (LCFS) program.

Additionally, as determined to be in the County's interest, engage with partnerships and coalitions within the region (including the establishment of the Tahoe-Truckee Biomass Task Force), state, and nationally. In addition, support all appropriate ecological restoration projects that remove biomass

from the forest and create renewable energy, alternative fuels, or other products, as well as any current or proposed biomass to energy or alternative fuel facilities within or adjacent to the County.

**b. Tree Mortality**

Support for local state and federal resources to address the tree mortality crisis in California. Support the achievement of a sustainable ecosystem and the maintenance of healthy forests while providing defensible space for protection of life and property. Support an increase in state and federal funding for fuels management and advocate that local governments be included in any effort to develop appropriate allocation of these resources.

**c. Timber Export**

Explore ways to expand outlets for sale of unprocessed timber coming from federal lands, including the potential for exporting such timber internationally.

1. Amending Section 489 of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S. Code §620(a)), to exempt California from the restriction, similar to what is outlined in S.4431 (Daines/Feinstein) SEC. 301. Exemption to Prohibition on Export of Unprocessed Timber of Dead and Dying Trees in the State of California;
2. Seeking a determination by the Secretary of Agriculture under 16 U.S. Code §620(b)(1) that such unprocessed timber from federal lands in California is considered “surplus to domestic manufacturing needs.” Per subsection (b)(2), any such determination must be issued in accordance with section 553 of title 5 regarding rulemaking and shall be reviewed at least once in every 3-year period, with notice of such review to be published in the Federal Register with an opportunity for the public to comment on such review; or
3. Exploring whether the **2023** Farm Bill could be a vehicle for allowing/encouraging overseas export of unprocessed timber from federal lands by expanding the Market Access Program (MAP), Foreign Assistance for Specialty Crops (FMDP), and/or Emerging Markets Program to include timber. Each of these programs is geared toward assisting U.S. industry efforts to build, maintain, and expand overseas markets for U.S. agricultural products.

**d. Funding**

1. **Resilience Investment:** Support \$50M in funding for Placer County for implementation of its 10-year, 22,000-acre Wildfire Resilience Action Plan that will reduce wildfire risk to national assets, such as interstate highway/rail/gas pipeline infrastructure and substantial national forest system lands.
2. **Wildfire Crisis Implementation Strategy:** Expand priority firesheds and increase funding to areas like Placer County that have approved wildfire resilience plans and project pipelines ready to permit and implement.
3. **Carbon credits:** Allow carbon credits to be generated from wildfire mitigation activities on the national forest system and other federal lands.
4. **Roads:** Expedite funding for road repairs and improvements on federal lands to ensure access for forest health, fuel management, and emergency firefighting.
5. **Personnel/Capacity:** Ensure sufficient staffing at the Forest and District levels to support partnerships that accelerate forest management work, including prescribed fire.

- 1.—Ensure adequate and accessible funding now and into the future by extending the life of state grant funds beyond the current 5-year encumber/spend timeframe; consider instituting a 10-year period within which the project proponents and funding agencies work together using benchmarks and other criteria to determine the appropriate life of the funds on a project-by-project basis. Additionally, allow future maintenance/retreatment funding to be included in the original treatment funding request, by using tools such as a project escrow fund or a long-

~~term statewide forest resilience/fuels reduction maintenance fund.~~

- ~~2.—Request \$25 million over 10 years to support planning and implementation of a comprehensive program of forest health and community wildfire resilience projects in Placer County, which is 50% federal forestland, has the highest number of habitable structure in the WUI of any of California’s 58 counties, contains critical interstate infrastructure (such as Interstate 80, the Union Pacific Railroad, and a major natural gas pipeline) as well as significant state and local water and hydropower generation/distribution facilities, and provides many other resources to residents, businesses, and visitors.~~
- ~~3.—Support continued work on S.4431—the Emergency Wildfire and Public Safety Act introduced by Senators Feinstein (D-CA) and Daines (R-MT) in 2020—that reduces wildfire risk and improves forest management by establishing wildfire mitigation projects, providing expedited review of certain fuel break projects, promoting development and use of biomass, and easing restrictions on overseas export of timber from federal lands in California.~~
- ~~4.—Make the recent \$1.5B state budget investments in forest resilience and wildfire risk reduction a baseline going forward, not a one-time capital infusion.~~
- ~~5.—Support the state Wildfire and Forest Resilience Task Force’s pilot program to fund landscape-level project work through pooled funding and block grants that extend the life of the funds and allow for future maintenance/retreatment to be included.~~
- ~~6.—Request at least \$100 million over 10 years to augment County expenditures (~\$20 million over 10 years) to implement the County’s new 10-year Wildfire & Forest Resilience action plan. Federal funding is critical because roughly 50% of Placer County is federal forestland, and the county contains critical interstate infrastructure (e.g., Interstate 80, the Union Pacific Railroad, Kinder Morgan natural gas pipeline.~~

e. **Prescribed/cultural burning**

Reduce regulatory barriers (e.g. liability, air quality limitations) to facilitate more prescribed and cultural burning and landscape-scale fuels treatment.

f. **Workforce**

Support statewide training program to build pipeline of trained, qualified practitioners and support services.

g. **Air Quality**

~~Develop air quality standards under Environmental Protection Agencies that evaluate the benefits of prescribed fire and cultural burning in avoiding the hazardous air quality conditions caused by mega-fires.~~

h. **Wood processing infrastructure**

Accelerate development and approval of wood products and processing infrastructure, including within Placer County. Activities could include: a.) strategically siting one or more biomass facilities in western Placer County that can accept and use excess woody material from forest treatment projects for value-added products, including energy and possibly others, and b.) making biofuels part of state’s climate strategy.

3. **Open Space**

a. **Placer Legacy Program**

Support legislation and programs that advance the objectives of the Placer Legacy Program and General Plan to protect open space and agricultural land in the County and to comply with state and federal laws. Support continued funding and allocation of the California Department of Conservation’s Sustainable Agricultural Lands Conservation grant funding and the California Wildlife Conservation Board’s allocation, including the 30x30 initiative and matching funds to support the Federal Endangered Species Act Section 6 land conservation and restoration grant funds.

b. **Placer County Conservation Program (PCCP)**

Seek and support legislation, rulemaking, programs, and funding to advance the objectives of the PCCP, a Habitat Conservation Plan and Natural Community Conservation Plan under the State and Federal Endangered Species Acts, designed to comply with state and federal wetlands and endangered species laws while streamlining regulatory procedures. The PCCP also includes the Western Placer County Aquatic Resources Program and In Lieu Fee Program to provide programmatic assurances necessary for the U.S. Army Corps of Engineers and other state and federal regulatory agencies to issue programmatic permits streamlining local, state and federal permitting processes. **Support the 5-year reissuance of the U.S. Army Corps of Engineer’s and California Water Board’s Programmatic Clean Water Act Section 401 and 404 Permits and encourage revisions that facilitate the PCCP’s permitting and implementation streamlining for public and private projects.**

**c. Federal Section 6**

Seek ongoing and consistent California Wildlife Conservation Board, U.S. Fish & Wildlife Section 6 Cooperative Endangered Species Conservation Fund and NOAA National Marine Fisheries Service grant awards to support the Placer Legacy Program and Placer County Conservation Program’s 50-year commitments to **conservation including the acquisition of lands, conservation easements, and restoration project planning, design, and construction.**

**d. Waters of the U.S. Rulemaking**

Due to changes in Presidential Administration and recent case law, the U.S. EPA and Army Corps of Engineers is once again revisiting their Waters (wetlands) of the U.S. rule and has embarked in the rulemaking process. The PCCP was issued Clean Water Act Section 401/404 programmatic wetland permits in 2021. The use and implementation of these permits to cover public infrastructure and private economic development projects requires consistent application of these rules. In addition, and for projects needing consistent application of the water/wetlands regulations throughout the County, the rulemaking process and outcome can have significant implications to permitting timelines and mitigation costs.

**e. National Historic Preservation Act Section 106 Streamlining**

Section 106 of the National Historic Preservation Act of 1966 (NHPA) requires federal agencies to consider the effects on historic properties of projects they permit, including transportation and public infrastructure projects and all projects carried out under the PCCP. Placer County and its partner agencies (PCWA, SPRTA, and the City of Lincoln) have sought a Programmatic Agreement to allow it to initiate Section 106 at the local level. The U.S. Army Corps of Engineers and State Office of Historic Preservation have been interested but unwilling to move this process forward prior to adoption of the PCCP. The PCCP is now fully permitted and operative and as such, negotiation and approval of the Program Agreement will require state and federal advocacy.

**4. Lake Tahoe Total Maximum Daily Load Implementation (TMDL)**

Seek or support legislation to: (1) minimize further water quality regulation and unfunded mandates, with an emphasis on minimizing administrative, monitoring, and inspection requirements that do not directly lead to cleaner stormwater; (2) facilitate implementation of local fee programs to support stormwater quality program implementation and; (3) continue and increase state and federal funding assistance for TMDL compliance and stormwater program implementation.

**5. Santini-Burton Act & Southern Nevada Public Land Management Act (SNPLMA)**

Support modifications to the SNPLMA to allow for flexibility of the funds from land sales to fund projects that advance the goals of the Santini-Burton Act and the Lake Tahoe Environmental Improvement Program

**6. ~~Protection of the landfills and wastewater facilities within Placer County Solid Waste, Recycling, and Landfills~~**

~~Support legislation and regulations that protect Placer County interests pertaining to landfills and wastewater facilities as essential public services and support operating flexibility, viable waste conversion technology, green technology, and Stewardship and Extended Producer Responsibility (EPR) legislation which shifts financial burden to producers. Support funding for County mandated programs and oppose mandates that do not contain a revenue source. Oppose infeasible performance standards, fee increases unless substantiated with data, unreasonable operational restrictions, and efforts that hinder or limit local control. Support SB 1383 legislative or regulatory amendments to provide flexibility, delay implementation dates, and/or provide enforcement leniency in consideration of lack of funding on local government and citizens, and to correct inconsistencies in the SB 1383 regulation that hinder implementation.~~

Support legislation and regulation that protect Placer County interests pertaining to solid waste and recycling collection, processing, and disposal as essential public services and that support operating flexibility. Support Extended Producer Responsibility which shifts the financial burden of recycling to producers. Seek and support grants and permanent funding for mandated programs and oppose new mandates that do not contain a revenue source. Oppose infeasible, unreasonable, or overly burdensome or prescriptive performance standards, fee increases unless substantiated with data, unreasonable operational restrictions, and efforts that hinder or limit local control. Support SB 1383 legislative or regulatory amendments to provide flexibility, simplify unnecessarily complex requirements, and delay implementation and/or enforcement.

**~~7. USDA Livestock Harvest and Processing Facility Funding and Regulatory Process~~**

~~Obtain funding to aid in the facility planning, design, and business planning that will proceed construction of a new USDA inspected slaughter and processing facility in Placer County.~~

**7. Water and Wastewater Utilities**

Support legislation and regulation that protect Placer County interests pertaining to water, and wastewater facilities as essential public services and that support operating flexibility. Support Extended Producer Responsibility which shifts the financial burden of recycling to producers. Seek and support grants and permanent funding for mandated programs and oppose new mandates that do not contain a revenue source. Oppose infeasible performance standards, fee increases unless substantiated with data, unreasonable operational restrictions, and efforts that hinder or limit local control. Support SB 1383 legislative or regulatory amendments to provide flexibility, simplify unnecessarily complex requirements, and delay implementation and/or enforcement.

**8. Un-Refunded Gasoline Tax Revenue**

Support or oppose legislation that would impact Agriculture Department gas tax revenue and evaluate based on how it would affect county program funding. Oppose legislation that would weaken agricultural and environmental protection funding in Placer County. Support legislation to backfill revenue lost as the California moves away from gas powered engines, freeing up General Fund.

**9. United States Forest Service (USFS) NEPA Funding for Noxious Weed Eradication**

Support long term funding for NEPA preparation and programs for the eradication of specific noxious weeds in the Integrated Resource and Restoration (IRR) USDA budget line item. Support specific allocations for weed projects and that those funds should not be diverted for use on other projects.

## 10. Wildlife Services Regulation

Oppose legislation or regulatory efforts which would limit the ability of Placer County personnel to perform their essential job duties in the most efficient, effective, and humane manner. To date, legislative efforts to restrict access to tools or methods have exempted law enforcement staff (Penal Code 830 et al.), but have failed to account for other government agencies who employ professional staff to protect human health and safety, the environment, and agriculture from wildlife-related damage or injury. Exemptions within future legislation or regulation should include non-law enforcement governmental professional staff.

## 11. Water

### a. Groundwater Sustainability

Implement the requirements of the Sustainable Groundwater Management Act (SGMA), including, but not limited to: affirm and implement Board policy and interests for the County, engage with partners and stakeholders, seek regulatory or legislative amendments to existing SGMA law as needed, evaluate modifications that emerge for potential action, and ensure that groundwater rights for the citizens of Placer County are protected by advocating for continued local control over our groundwater. In addition, support and contribute to the Sacramento Water Bank (a Federal process) which is being developed to a project to store an additional 1,000,000 acre feet underground, and the River Arc program, a project designed to flow water from the Sacramento River to the region, will help to provide additional and back-up water resources to the entire region, including Placer County.

### b. Regional Water Strategy

Support the efforts of Regional Water Authority and the regional water purveyor team (the Sacramento Water Alliance) to protect our water resources and prevent increases in fees and/or changes in our infrastructure that is dedicated to conveying and distributing water to Placer County residents through advocacy and other means.

### c. Water Quality Improvements

Seek or support funding for existing and future water quality improvement and stream environment zone restoration projects.

## 12. Farm Bill Reauthorization

- a. Continue to support reauthorization and/or amendment of certain existing elements and addition of certain new elements within the **Conservation (Title II)**, Trade (Title III), Rural Development (Title VI), Forestry (Title VIII), and Energy (Title IX) sections of the 2018 bill. These sections contain potential policy and/or funding opportunities affecting public and private forest management and forest biomass feedstock programs that are necessary to facilitate improved forest health and wildfire resilience in Placer County and other forested communities.
- b. Advocate for inclusion of authorized funding at a minimum of \$75 million and ideally an increase to \$100 million in annual funding for exotic pest prevention activities carried out by states. Support additional companion efforts to fund rehabilitation or replacement of the existing Los Alamitos sterile Medfly rearing facility and the establishment of a new USDA detector dog K9 training facility in California.

## 13. University of California Agriculture and Natural Resources (UC ANR) - Farm Advisor Funding

Support opportunities advocate for state funding to restore and maintain academic staffing levels in University of California Cooperative Extension (UCCE) county offices.

**14. Payments In Lieu of Taxes (PILT)**

Advocate for a long-term reauthorization of mandatory entitlement funding for the PILT program. In the absence of a long-term renewal, Placer County will support continued full funding for PILT via the appropriations process.

**15. Secure Rural Schools (SRS)**

Placer County will maintain efforts aimed at securing a multi-year reauthorization of the SRS program. Absent a long-term program renewal, Placer County will continue to support short-term extensions of the Act.

**16. Formerly Used Defense Site Cleanup**

Seek funding for the Formerly Used Defense Sites (FUDS) Program through the Army Corps of Engineers to address Trichloroethylene (TCE) contamination at the former Titan 1-A Missile Site in Lincoln.

## GOVERNMENT FINANCE AND OPERATIONS

**1. Library Access to Digital Materials**

Support equitable and unrestrictive access for libraries to purchase electronic books, audiovisual content, and other digital content.

**2. Restoration of Library Funding**

- a. Support full restoration of California Library Services Act
- b. Support funding for Lunch at the Library
- c. Support funding Zip Books which provides reading materials to the rural and underserved areas.

**3. Broadband**

Seek funding for deployment, availability installation and expansion of broadband (high speed internet service) to all parts of the County to drive economic development and job opportunities, support county service delivery, and improve health, education and public safety outcomes for residents.

- a. Support local decision-making and accountability and oppose any actions that would preempt or limit the zoning and siting authority of the Board of Supervisors.
- b. Support implementation of CPUC enforceable Internet Service Provider customer service standards that enhances broadband reliability and reduces customer outage time.

**4. Property Owner Insurance Coverage**

Support any combination of plans, programs, regulation, or legislation at the state and federal levels to mitigate loss of property insurance coverage. Coordinate with insurance companies, state agencies, homeowners, business owners and other stakeholders to minimize the loss of insurance coverage and seek mutually beneficial conditions that would support wide availability of insurance at rates that are both competitive and risk based.

**5. Disadvantaged Communities**

Seek or support legislation or regulations to develop a streamlined definition of Disadvantaged Communities (DACs). Support efforts to align DAC funding formulas with relevant community needs.

**6. General Liability**

Monitor legislation or initiative and take a support or oppose position, as necessary, related to Tort Reform, Medical Malpractice Reform Act, Medical Injury Compensation Reform Act (MICRA) Ballot initiative, or changes to indemnification language on government code for contracts and professional liability.

**7. California Public Records Act Reimbursement**

Support legislation that would allow local governments to charge requesting parties for reimbursement of staff time involved in fulfilling Public Records Act requests.

**8. Fund County Veterans Service Officers**

Seek or support permanent funding for County Veteran Service Officers who participate in the CalVet County Subvention Program.

**9. Workforce Development**

- a. Support in the planning, administration, and supervision of comprehensive local systems of workforce training and employment, with a minimum of federal regulation.
- b. Support additional workforce development programs through Placer County to expand opportunities to business and residents. Collaborate with the Business Advantage Network, Sierra Business Council, William Jessup, Sierra College, CSUS– Placer Center and Small Business Development Programs to create a more robust program.
- c. Pursue national and regional opportunities for in-demand labor training and education for various sectors including public safety and healthcare.

**EMPLOYEE RELATIONS AND ADMINISTRATIVE SERVICES**

**1. Employee Relations**

Oppose legislation and regulations that would reduce local control as pertains to employee relations and collective bargaining, and mandated benefits, or that may otherwise create adverse fiscal outcomes with implementation of the Public Employees Retirement Board, Meyers-Milias, and other labor-related laws and regulations. Seek or support legislation and initiatives for regulatory change to meet objectives.

**2. Workers' Compensation**

Monitor legislation and regulation and take a support or oppose position, as necessary, as it relates to indemnity benefits (including temporary total, temporary partial, wage loss and permanent partial, permanent total disability benefits and death benefits).

## HEALTH AND HUMAN SERVICES

### 1. Child Support Arrearages

- a. Seek and support legislation that exempts Child Support from list of judgments upon which interest must accrue.
- b. Support legislation that includes the Child Support Program as a debt collection entity to obtain winnings for owed support from any gaming and/or gambling revenue.
- c. Sponsor and/or support efforts to remove sunset provision of Family Code section 4007.5. for incarcerated individuals.
- d. Support amending Family Code section 4059 to allow courts to consider existing ordered support obligations that persons paying support are responsible for at the time that subsequent orders are established. This will permit the use of low-income adjustments in many cases, increase cooperation/payments with obligors, ensure proper orders for all children, reduce the number of review and adjustments, and reduce uncollectable debt.

### 2. Child Support Operations and Funding

- a. Support legislation that provides funding protections to counties for the Child Support Program, and the Child Support Agencies (LCSAs/Local Child Support Agencies) which must provide the services. Additionally, support policy and legislative changes pursuant to the Final Rule, which allows for modernizing collections, guideline calculation review and creating efficiencies to lower the cost of collections.
- b. Support clarification of existing law to allow federal incentive funds under §45 CFR 305.35 to permit rollover, as long as funds are spent in accordance with existing law. This clarifies that the timing of the expenditure can be future years, as long as the purpose of the expenditure continues to meet other existing federal regulations.
- c. Amend the law to add DCSS to the list of California Departments which must be noticed for Probate. This would effectively add Child Support as a judgment creditor for Probate.
- d. Support legislation that reinstates Family Code Section 17706 by opposing further suspension, or by removing the current suspension.
- e. Support proposals that expand the definition of “allowable” expenditures, promote flexibility in the delivery of services, meet the needs of customers, and streamline the program.
- f. Support proposals which expand the definition of “allowable” expenditures, promote flexibility in the delivery of services, offer more opportunities for parental choice in which services they utilize.
- g. **Support proposals that expand the definition of “allowable” expenditures that promote flexibility in:**
  - i. **delivery of services to offer more opportunities for parental choice, including “in-kind” support.**
  - ii. **Workforce development programs for customers**
  - iii. **Administrative cost reimbursement as it relates to visitation expenditures**

### 3. Dedicated Funding for Chronic Disease Prevention and Wellness Promotion

Support a dedicated funding stream to fund preventive health services or activities that improve community health outcomes. Advocate for flexibility for California to design prevention programs to take advantage of California’s state and local health department strengths and encourage the provision of base funding to state and local health departments with additional funding available on a competitive basis. Encourage the allocation of new revenue streams in an equitable manner across all local health jurisdictions. Seek to improve nutrition, obesity, and fitness education programs as well as

health literacy in California's population.

**4. Minor Consent to Mental Health Services for Medi-Cal Youth**

Support alignment of Medi-Cal reimbursed versus non-Medi-Cal reimbursed policies for minors 12 years of age or older to consent to mental health treatment or counseling services if the minor is mature enough to participate intelligently in the outpatient services or counseling services, regardless of insurance status.

**5. Child Abuse and Neglect Reporting Act (AB 2085 - Holden)**

Support any changes and/or clarifying language in legislation that ensure the formerly early indicators of general neglect that often lead to more serious instances of child safety are not impacted by AB 2085 changes in child neglect reporting requirements. Provisions of this bill limited the definition of general neglect to only include circumstances where the child is at substantial risk of suffering serious physical harm or illness, and would provide that general neglect does not include a parent's economic disadvantage, and inability to provide resources due to poverty, homelessness, etc.

**6. Foster Care**

**a. Funding for Assembly Bill 12 (Beall): California Fostering Connections to Success Act**

Support full state funding of this required program, or legislative changes to the original bill to allow for prioritization of youth who qualify for the services within the state funding granted.

**b. Federal Family First Prevention Services Act of 2018**

Support selected provisions of, and advocate for full federal and state funding of the Federal Family First Prevention Services Act of 2018 (P.L. 115-123) enacted to reform the federal foster care system.

**c. Foster Family Agency (FFA) Insurance**

Support legislation that protects the foster care insurance market. Virtually all FFAs in California have been insured by one insurance provider, NIAC, which has given notice that they are planning to leave the California market and will not renew policies due to liability risks.

Placer County is concerned about the potential loss of FFAs which have an important role in our continuum of services for foster youth and the families who support them. It is vital to our state's goal of serving all foster youth in family homes rather than group settings. Loss of FFA capacity also puts more pressure on county agencies not only to find placements, but also to support families 24/7. This will require additional social workers, in-home support counselors, and clinicians to pick up this intensive, mandated work.

**d. Foster Care Payments**

Support efforts for counties to utilize Social Security benefits to offset care and placement expenses. Existing law requires every youth who is in foster care and nearing emancipation to be screened by the county for potential eligibility for SSI benefits. Recent concern has arisen that when counties screen for SSI, they also apply to collect the benefits on behalf of the youth (known as representative payee), and then use those funds to offset care and placement expenses, instead of saving the funds for the youth when they become legal adults. AB 2906, enacted in 2024 sets forth a variety of changes to existing law to require counties to screen for all federal Social Security Administration (SSA) benefits on an ongoing basis, notify the recipient child or nonminor dependent and their caregiver of the status, and prohibits use of the funds by counties to offset expenses for the care of the youth (known as abatement).

**7. General Health and Human Services Program**

- a. Support accurate adequate, flexible, and stable funding and regulatory interpretation to best meet Federal/State Health and Human Services program requirements including Child Welfare Services, Mental Health Services, Substance Use Disorder Services, Human Services, Adult Protective Services, In-Home Supportive Services, California Children Services, and Health Reform. In addition, support innovation by maximizing flexibility in program design, increasing Federal/State funding leveraging opportunities, and streamline State program requirements and regulations.
- b. Support client access permitting online engagement and electronic interviews to reduce cost, increase participation and reduce duplicative eligibility processes.

**8. Behavioral Health and Substance Use**

- a. Support state and federal funding opportunities to increase the accessibility and funding for quality substance abuse and mental health services for vulnerable and at-risk children, adults, and families. Support legislation that simplifies and integrates behavioral health funding to ease the ability to leverage funding and find local solutions. Support the ability to expand the use of Prop 63 funding for those with primary substance use disorders and allow use on models that are known to decrease costs and improve outcomes (e.g. CSUs). Make available funds and new programs equally available to both rural and urban areas. Support regulation that incentivizes and assists the development of increased Mental Health placement facilities that are high quality and recovery focused.
- b. Support legislation which would revise elements of AB 1299 (Ridley-Thomas) which required the automatic Presumptive Transfer of Specialty Mental Health Services. Legislation is needed to allow for a method between counties, to ensure payment of matching funds to counties who deliver services to a youth who is presumptively transferred for other SMHS.
- c. Support Behavioral Health initiatives, such as California Advancing and Innovating Medi-Cal (CalAIM), that considers financing, workforce, regional needs, and that incentivizes positive outcomes relevant to the most vulnerable and least capable of seeking healthcare. Advocate for Department of Health Care Service-initiated CalAIM changes impacting specialty mental health, ensuring they are appropriately financed and prioritize client care and efficiency. Support CalAIM efforts lead by the Health Plans to be well coordinated between County and Health entities, benefit the consumer, focus on accessibility, and fiscally cover costs of providers, including County-provided services. Preserve the Affordable Care Act and Publicly Funded Health Coverage and support efforts to extend and stabilize the funding in the Children's Health Insurance Program. CalAIM has changed medical necessity requirements for foster youth, allowing automatic entry into specialty mental health services. While this will lessen barriers to mental health care, it may also increase the fiscal impact to counties as managed care plans may decline to provide services for those with mild to moderate conditions, and instead expect counties to provide all intensities of behavioral health care. This would impact the need for additional providers at the county level, as well as a need for funding to draw down Medi Cal.
- d. Support partnerships with Health Care and Criminal Justice to increase capacity of an array of options along a continuum of crisis services that include funding for substance use disorders, detoxification and recovery services, and meet the needs of individuals with medically complicated health issues.

- e. Reform of the Lanterman-Petris-Short Act in a manner that protects patient due process rights, accounts for the county role under the Act and increases funding for services mandated by the Act.
- f. Support regulation that incentivizes, funds, and assists the development of increased Behavioral Health placement facilities that are high-quality and recovery focused.
- g. Support the decriminalization of behavioral health conditions by expanding community treatment for people living with a mental health and/or substance use disorders, and support funding for diversion programs and competency-based programming both in and out of custody, and policies that reduce the incarceration of people with mental illness.
- h. Support policy that leads to more housing resources (permanent supportive, affordable, and temporary housing solutions) and reduces barriers for individuals with mental health and/or substance use disorders.
- i. Advocate for county involvement in the planning and implementation of 988 to ensure efficient connection to the County operated crisis continuum. Ensure funding for County entities to build a more enhanced crisis continuum that will meet the needs of 988 legislation and be closely aligned with nationally recognized approach (e.g. Crisis Now).
- j. Support the implementation of SB 1883, the Community Assistance, Recovery and Empowerment Act (CARE Act), which was previously known as CARE Court. The CARE Act will provide support and accountability for individuals with severe untreated mental illnesses as well as for local governments responsible for providing behavioral health services. Increased accountability will be provided through California's civil courts. Advocate for additional implementation and ongoing funding from the state to support this program.

#### **9. Institutions for Mental Disease Exclusion – 16 Bed Limit**

Support efforts to increase the current 16-bed limit on Psychiatric Health Facilities to receive federal funding.

#### **10. Built Environment and Climate Change**

Support legislation and funding that encourages the inclusion of health in all policies and consideration of public health impacts in the design and planning of healthy communities. Support efforts and funding to develop climate change mitigation and resiliency strategies to help protect against and address potential impacts on human health such as increased respiratory and cardiovascular disease, injuries and premature deaths related to extreme weather events, including fires, changes in the prevalence and geographical distribution of food- and water-borne illnesses and other infectious diseases, and threats to mental health, particularly for disadvantaged communities most vulnerable to the effects of climate change. Support legislation and funding that seeks to plan for and mitigate impacts and related health inequities associated with extreme heat, extreme weather events, and poor air quality associated with climate change and wildfires.

#### **11. Older Adults and Persons with Disabilities**

- a. Support legislation that would establish a comprehensive and coordinated system and provide options for long term care activities that will secure and maintain maximum independence and dignity in a home environment, remove individual and social barriers to economic and personal independence, provide a continuum of care for vulnerable seniors, and provide a comprehensive response to elder abuse/neglect and exploitation.
- b. Support legislation that would provide adequate funding such as state-only funded programs, programs authorized under the Older Americans Act, a return to full funding for Social Services

Block Grant (SSBG) programs and increases to the SSBG allocation to keep up with inflation and population growth.

**12. Realignment**

Support efforts and legislation to achieve protections, dedication of adequate revenue, and flexibility leading to best outcomes for Placer County including those related to 1991, 2011 and 2013 State/County Realignments impacting Public Safety and Health and Human Services.

**13. Categorical Eligibility**

Support policies that reduce the administrative burden on County agencies and staff, and those that limit the financial burden at the County level to deliver mandated services.

**14. Chronic Disease Prevention**

Support dedicated Funding for Chronic Disease Prevention and Wellness Promotion.

**15. Social Services Funding Methodology**

Support accurate adequate, flexible, and stable funding to CalWORKs, CalFresh and Medi-Cal agencies to ensure sufficient resources based on actual costs to implement new programs and services at the levels required to achieve required outcomes and serve new program populations.

**16. Communicable Disease Surveillance, Prevention, and Control**

- a. Ensure adequate regulations, legal authority, funding and resources for state and local public health infrastructure to monitor, evaluate, respond to, and provide communication about communicable disease threats and outbreaks, including but not limited to; tuberculosis, sexually transmitted infections, vaccine-preventable diseases, enteric diseases, and emerging infections.
- b. Ensure collection of appropriate data, reporting and analysis from health care systems and facilities as well as electronic sharing (i.e. health information exchange, disease and immunization registries) with public health departments to allow for timely identification and response to communicable disease threats.
- c. Ensure access to and insurance coverage for communicable disease prevention and treatment services including screening, immunizations, medications, and counseling, for those populations and communities disproportionately impacted by communicable diseases.
- d. Advance community policies, programs, and legislation that prevent the spread of communicable diseases.

**17. Oral Health**

- a. Support adequately funded state oral health prevention program to serve all high-risk children and older adults.
- b. Support funding and resources for periodic epidemiologic assessment of the state of oral health in the population.
- c. Support additional legislation and funding to remove practical barriers to community water fluoridation.

**18. Veterans**

Support state and federal funding opportunities to increase veteran access to benefits.

**19. COVID-19 Vaccine Mandate**

Oppose legislation, regulatory effort, and mandates which would require a COVID-19 vaccine or proof of vaccination. This includes as a requirement for employment and enrollment in educational institutions, both public and private. Support decision-making and accountability at the local level and for business owners and oppose any actions that would preempt or limit the authority of the same.

**20. Emergency Housing and Homeless Assistance**

- a. Support state and federal funding opportunities to develop emergency housing and expand full range of housing and homeless assistance programs.
- b. Expand funding and enhance grant funding opportunities for Placer County service providers, including homelessness prevention programs, rapid rehousing assistance, homeless shelter and services, and emergency housing development and assistance programs.

**HOUSING, LAND USE, AND TRANSPORTATION**

**1. Affordable Housing**

- a. Increase availability of funds and programs including infrastructure (e.g., water and sewer), project predevelopment, and for the preservation of workforce housing, to both rural and urban areas.
- b. Support increasing developer tax credits to promote building affordable housing for households with greater than 80 percent area median income (AMI).
- c. Support tax credit competitiveness for affordable housing units based on local need and support flexibility to house qualified applicants in any available unit.
- d. Support the California Housing and Community Development Department’s (HCD) role that focuses on providing funding programs that are easy for local governments to administer and facilitate affordable housing production.
- e. Remove barriers or constraints for the construction of multifamily, attached, or other housing products that are affordable by design.
- f. Support State and Federal funding and regulatory changes or guidance that supports landlords and prevents homelessness.
- g. Increase the priority of funding for for-sale housing for moderate-income households.

**2. Housing Element Reform**

- a. Support reform of the current housing element requirements to streamline and simplify existing housing element law.
  - i. The housing element should place a greater emphasis on obtaining financing and enabling production, rather than the overly detailed data analysis now required under state law.
  - ii. Housing element reform should provide local governments with the flexibility and creativity to adopt local housing elements, comprehensive housing assistance strategies, and other local plans and programs that will be effective in their communities.
  - iii. Housing element reform should conserve state and local resources by promoting consistent with statutory requirements, including transparent standards that are uniformly applied and includes timelines for comment periods and decision-making.

### **3. Multi-Jurisdictional Collaboration for the Region's Housing Needs**

Support a regional approach to housing needs by supporting collaboration with communities within multiple jurisdictions that are within close geographical proximity, particularly rural communities, and communities above 5,000 feet in elevation, on state housing requirements and resources.

### **4. California Environmental Quality Act**

Support legislation that improves and streamlines the California Environmental Quality Act (CEQA) and provides funding to assist local agencies in implementing CEQA. Also support other CEQA streamlining to support infill development in suburban and rural-areas. The CEQA process and requirements should be simplified wherever possible including the preparation of master environmental documents and use of tiered EIRs and negative declarations, including qualified Greenhouse Gas Reduction programs and associated environmental impact reports for tiering under CEQA.

### **5. National Pollution Discharge Elimination System (NPDES) Phase 2 Regulations**

Support NPDES Phase 2 permit requirements that are reasonable and implementable by municipalities. The State Water Resources Control Board (SWRCB) should return to implementing the minimum Federal Clean Water Act requirements without expanded permit conditions that are impossible to meet. Support federal funding assistance and legislation to make it easier to implement local fee programs for storm water quality program implementation.

### **6. County Transit Sales and Use tax Exemptions for Diesel & CNG**

Sponsor legislation to amend Revenue and Taxation Code Sections 60039(a)(1) and 8655(b)(1) to include "county" in the list of public transit operators exempt from sales and use taxes on diesel and CNG fuel, thereby extending the tax exemption to counties that operate transit systems and use these fuels in county-owned buses.

### **7. Transportation and Transit**

Seek and support legislation, regulations, and grant funding for local and regional transit and transportation.

- a. Seek grant funding and financing, as appropriate, for priority infrastructure such as the Better Utilizing Investments to Leverage Development (BUILD) and the Transportation Infrastructure Finance and Innovation Act (TIFIA) and new funding sources through the Infrastructure and Investment Jobs Act (IIJA).
- b. Seek and support federal funding and financing for the Placer Parkway Project.
- c. Seek and support funding for Baseline Road widening and safety improvements.
- d. Seek and support funding for Watt Avenue Bridge widening.
- e. Support-a Transportation Funding Plan for Eastern Placer County. Support participation in regional transportation planning and funding efforts with TRPA, TTD, and other Tahoe area regional agencies. Target funding and revenue exploration efforts, and make sure state and federal executive and legislative support, where appropriate, can help the county secure its fair share of revenue to address the needs of improving current and future transportation infrastructure.
- f. Support efforts to ease traffic congestion on Highway 89 and Highway 267. This includes exploring the possibility of a third traffic lane on Highway 267 and work with Caltrans and California

Highway Patrol to create a pilot program on Highway 89 and 267 to ease traffic congestion during peak hours and emergencies.

- g. Diligently pursue all funding sources to facilitate infill development of affordable housing and mixed-use development in close proximity to transit service and employment centers, to reduce vehicle miles traveled (VMT) by shortening commute distances for the County's workforce and student population.
- h. Support legislation that improves and streamlines the permitting process to expand electric-vehicle (EV) infrastructure and multi-modal public transportation projects and provides funding to assist local agencies in implementing supporting actions within adopted Greenhouse Gas Reduction Programs.
- i. Explore opportunities to facilitate a regional VMT mitigation strategy to support development that may not otherwise be able to mitigate project VMT impacts on-site.
- j. Transportation system maintenance should be viewed from the lens of "fix it first" and should support local governments by allocating transportation and budget surplus funds first to bringing up the overall Pavement Condition Index (PCI) to an adequate level.
- k. Repairs to local access roads that are damaged in the course of during emergency operations (e.g., during a fire or flood) should be eligible for reimbursement under the same programs as roads which are directly damaged by the event.
- l. Support local control in transportation funding measures as California begins to shift away from gas-powered vehicles which will coincide with a drop in local-gas tax revenues.

#### 8. Local Control and Equity of Road User Charge

Placer County relies on State and Federal gas taxes for the maintenance and operation of our county-maintained road miles including maintenance of road infrastructure (pavements, bridges, culverts, signals, signs), snow removal, and general road and transportation engineering and planning. Fuel efficiency gains, increase in zero-emission vehicles, inflation and loss of purchase power, and uneven fuel tax burden will likely contribute to long-term decline in gas tax revenue and the County's ability to maintain and operate our local road system.

- a. Engage in State and Federal road charge pilot programs including efforts where all levels of County government can participate in policy development.
- b. Begin to develop and explore locally controlled road charge alternatives.
- c. support legislation that is locally controlled, locally equitable, and at minimum, maintains current road maintenance and operations funding levels.

#### 9. CARB Advanced Clean Fleet Rulemaking Process

Support rules that provide additional time for implementation. The regulation as proposed requires public fleets to begin conversion in 2024 with 50% of added vehicles being zero emission and 100% by 2027. Support a slower phase in through 2040 which will allow the County to better consider the location of charging facilities to match the location of future needs.

- d. Define "Commercially Available" prior to requiring fleets to make future purchases of new medium- and heavy-duty vehicles starting as early as 2025.
- e. Support common sense rulemaking provisions that ensure sufficient supply to:
  - i. be purchased and received in acceptable time-frame comparable to available internal combustion emission vehicle (ICEV).
  - ii. Available in sufficient quantities to provide for a competitive bidding environment and avoid

- price manipulation by vehicle manufacturers and dealers.
- iii. Available from multiple reputable vehicle manufacturers as a certified zero-emission powertrain.
- iv. Meets required specifications (e.g. duty cycle duration, elevation, climate, emergency response conditions, off-road capabilities) and exists in practice.
- v. Sold for no more than 33% over retail price for ICEVs of the same vehicle configuration.
- f. In Section 2013(d) please clarify that to “add” fleet means to place a final order for fleet.

#### **10. Sustainable Communities**

- a. Support legislation that expands community revitalization and economic development tools including funding options for projects that provide demonstrable benefits to reduce Greenhouse Gas emissions, increase climate resiliency and public safety, improve energy efficiency, and reduce energy costs for residents.
- b. Support the preservation of federal funding for the Community Development Block Grant (CDBG) program and increasing the funds available under the program, to expand the availability of a mix of housing types in the County for existing and future residents, students, and employees whose income cannot support the cost of market rate housing in the County.
- c. Oppose imposition of one-size-fits-all land use, building and development guidelines related to sustainability.
- d. Pursue funding sources to facilitate innovative projects in rural areas to increase climate resiliency including expansion of broadband and communication facilities for emergency preparedness, construction of cooling hub locations with microgrid capabilities during Public Safety Power Shutoff (PSPS) events, expansion of electric vehicle infrastructure, and walkability and connectivity to services and public transportation.
- e. Support legislation that removes barriers to the expansion of electric-vehicle (EV) infrastructure and transitioning development from natural gas to electric to support more sustainable and cleaner energy options. Instead, consider the relative impacts from development in suburban and rural contexts, including the challenges to supporting infill development.

#### **11. Economic Development**

Seek or support legislation and regulations as determined to be beneficial for Placer County projects and economic development initiatives.

##### **a. Infrastructure**

Seek Federal funding and financing for capital improvements with targeted focus on improvements within the Sunset Area, North Auburn and the Tahoe Basin, and the housing opportunity areas identified in the Housing Element.

##### **b. Foreign Trade Zone**

Support increased investments in foreign trade zones.

#### **12. Fair Funding**

Placer County recognizes that fairs represent a critical state and community asset that is in dire need of funding and strongly support the development of a comprehensive solution that will ensure the viability of the Placer County Fair.

#### **13. Lake Tahoe Environmental Improvement Program**

Advocate for and support legislation for state agency regulations and grant eligibility criteria that would provide funding for environmental restoration, environmental redevelopment activities, housing, and expansion of multi-modal transportation systems in the Lake Tahoe Basin as well as implement Placer County's Area Plan.

**14. Passenger Rail**

Support expanded service to/from Placer County. Work with Union Pacific to expand passenger rail opportunities for Placer County including additional tracks.

**PUBLIC SAFETY & EMERGENCY MANAGEMENT**

**1. Public Safety Realignment**

Seek or support legislation to achieve stable and adequate revenue and flexibility leading to best outcomes for Placer County. Success at the local level requires: sufficient and reliable state revenue and programmatic flexibility; dedicated federal and state funding to ensure criminal justice facility needs are adequately met (Jail, Placer Re-Entry Program, crime lab, and transitional housing); and sufficient capacity and sustainable funding for a continuum of substance use services to maximize public safety while reducing recidivism of offenders.

**2. Trial Court Security**

Pursue adequate and sustainable funding for court security as mandated by the State.

**3. Sexually Violent Predators**

Support efforts to stop the transient release of Sexually Violent Predators

**4. Felony Incompetent to Stand Trial (IST) Growth Cap and Penalty Program**

Advocate for program changes that better reflect the number of individuals who are deemed IST and referred to Department of State Hospitals by the courts as well as the county's role in this determination.

**5. Justice and Public Safety Funding**

Advocate for maximum program resources for other key federal justice and public safety programs that are administered through the U.S. Department of Justice, including the Edward Byrne Memorial Justice Assistance Grant (JAG) Program, the Second Chance Act (SCA), the Victims of Crime Act (VOCA), and the Violence Against Women Act (VAWA).

**6. Emergency Management**

Support legislation and regulations that maximize Placer County's ability to effectively mitigate, prepare for, respond to, and recover from natural and man-made disasters and public health emergencies, protecting both physical and fiscal health. In addition, emergency management and homeland security policies, practices, and funding should be designed to promote innovation at the local level and to permit maximum flexibility so that services can best target individual community needs, hazards, threats, and capacities. This includes:

- a. Support adherence to the Standardized Emergency Management System (SEMS) and the National Incident Management System (NIMS) processes, especially as they relate to the operational area concept.

- b. Advocate for improved coordination between state and local offices of emergency services and state and local departments with health and safety-related responsibilities (e.g. California Health and Human Services Agency, Department of Health Services, and the Emergency Medical Services Authority, and county offices of emergency services, county health agencies and local emergency services agencies).
- c. Work to ensure that proposals that impose responsibilities upon counties are accompanied by full and flexible funding.
- d. Support full and flexible funding for on-going emergency preparedness and all hazard planning.
- e. Support grant processes, procedures, and guidelines that allow full funding for personnel to carry out emergency management and homeland security programs.
- f. Support full and flexible funding for emergency communication system interoperability between all local government agencies and the State of California.
- g. Advocate for broad county access to technologies that offer effective and wide-ranging communications capabilities for alerting the public in emergency situations.
- h. Advocate at the federal level for policies and requirements that are practically achievable by local governments.
- i. Advocate for legislation and initiatives aimed at reducing the incidence of truck fires on roadways and enhancing the effectiveness of responses to electric truck fires through improved knowledge and preparedness.

**7. Community Power Resiliency (Public Safety Power Shutoff)**

Support efforts to limit the scope and duration of proposed power shutoffs. Additionally, support efforts that limit the impact of power shutoffs to business and residents.
